ABOUT THIS PANEL

UN Special Rapporteur Francesca Albanese's June 2025 report names the 48 top corporations profiting from the genocide in Palestine. As the annual Nuclear Deterrence Summit in Washington reveals, most of those same contractors, universities, and Pentagon departments constituting our nuclear weapons industry, are the same "enterprise" preventing the NPT from fulfilling its mandate.

The same war economy that fuels genocide also drives our nuclear proliferation, shuns U.S. public discourse, and suppresses accountability at home and at the United Nations. This panel examines those connections and offers pathways forward.
